

EXPERIMENT:-11

Create a new NotebookLM project titled:
“My Chapter Revision Notes.”

a) Upload multiple sources (any 2) such as:

- i. PDF notes
- ii. Web articles
- iii. Text copied into NotebookLM

b) Ask NotebookLM to:

- i. Create a combined study guide using all sources.
- ii. Generate flashcards for quick revision.
- iii. Create a concept map or explanation of the topic.

c) Manually check for:

- i. Any incorrect facts
- ii. Repeated information
- iii. Missing important points

d) Attach 3 screenshots from NotebookLM: i. Combined study guide ii. Flashcards iii. Concept map/explanation.

How effectively does NotebookLM balance its veracity and inherent AI limitations?

NotebookLM strikes a balance between its veracity and inherent AI limitations primarily through its grounded, "closed-loop" design and its commitment to source verification. While its features allow for highly diverse and advanced applications, users must maintain a critical awareness of the tool's remaining flaws, especially regarding complex cognitive tasks.

The Balance: Veracity Supported by Verification

NotebookLM achieves a unique balance by being intentionally constrained: it only uses the sources you provide, which drastically reduces the issue of fabricated facts ("hallucinations") commonly associated with general AI models.

Aspect	Effectiveness and Veracity Strengths	Inherent AI Limitations (Weaknesses)	Balancing Mechanism
Groundedness & Reliability	The "closed-loop" model ensures answers are traceable and verifiable against the original sources. It performs excellently in synthesis of relevant information and organizing.	Despite being grounded, it is "not perfect" and can still produce incorrect or fabricated answers ("hallucinations"). It sometimes fails to recall relevant information or introduces inaccuracies in the	Every response, including explanations and quiz feedback, is provided with citation bubbles that link directly back to the original source passage, making verification possible.
